

2006 SUZUKI blizzard

◆◆◆ Introducing Blizzard, one of four Suzuki LIVE Concept Vehicles

An in-car game system—so you have something to do while you're waiting for the chairlifts to open.

Wouldn't it be great if grownups got snow days? And every SUV had a warm, dry place like this where you could put on your gear?

Built-in glove warmers? And boot warmers? Your grandmother's probably not this thoughtful.

People have flat screens in their living rooms. Why not the back seat of your SUV?

A roof rack camera lets you keep an eye on your board. Or the guy behind you.

With Blizzards wide grip tires, you can dream about boarding conditions instead of worrying about road conditions.

Suzuki LIVE

We're out to become the car company that makes vehicles for people who really go for it – you know, the kind of people who go kayaking before breakfast, bungee jumping on their lunch hour and board downhill by twilight. So before we designed the Blizzard, we picked the brains of life enthusiasts, adventurers and thrill seekers. Talking to people like you was the only way to figure out how to build the vehicles you want – cars and SUVs that aren't just a means of getting from point A to point B, but are as integral as the leash on your surfboard, the chain on your dirt bike or the foot strap on your water ski. You had some pretty good ideas. They resulted in the Suzuki Sea, the Dune, the Wave and the Blizzard, the Suzuki LIVE VEHICLE Concept Series (LIVE). Looking to get more out of life? We're giving you the green light.
